A Project Report on

Farmer Support Application for
Agricultural Information and Awareness

Submitted in partial fulfillment of the requirements for the award of the degree of

BACHELOR OF TECHNOLOGY

in

CSE - ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

Submitted by

S.Sasi(24P31A42W8)

I.Swetha(25P35A4220)

G.Srivalli(25P35A4218)

2025-2026

Community Service Project Report

Submitted in accordance with the requirement for the degree of Bachelor of Technology

Name of the College: Aditya College of Engineering and Technology

Department: CSE-AIML

Name of the Faculty Guide: Ms. S.S.V Kiranmayi MTech,(PhD)

Duration of the CSP: From 11-05-2026 To 20-06-2026

Name of the Student: Sankumalla Sasi

Program of Study: Bachelor of Technology

Register Number: 24P31A42W8

Year of Study: 2025-2026

Semester: 3-1

Date of Submission: 22-09-2026

Community Service Project Report

Submitted in accordance with the requirement for the degree of Bachelor of Technology

Name of the College: Aditya College of Engineering and Technology

Department: CSE-AIML

Name of the Faculty Guide: Ms. S.S.V Kiranmayi MTech,(PhD)

Duration of the CSP: From 11-05-2026 To 20-06-2026

Name of the Student: Inapanurthi Swetha

Program of Study: Bachelor of Technology

Register Number: 25P35A4220

Year of Study: 2025-2026

Semester: 3-1

Date of Submission: 22-09-2026

Community Service Project Report

Submitted in accordance with the requirement for the degree of Bachelor of Technology

Name of the College: Aditya College of Engineering and Technology

Department: CSE-AIML

Name of the Faculty Guide: Ms. S.S.V Kiranmayi MTech,(PhD)

Duration of the CSP: From 11-05-2026 To 20-06-2026

Name of the Student: Gudala Srivalli

Program of Study: Bachelor of Technology

Register Number: 25P35A4218

Year of Study: 2025-2026

Semester: 3-1

Date of Submission: 22-09-2026

Community Service Project Report

Submitted in accordance with the requirement for the degree of Bachelor of Technology

Name of the College: Aditya College of Engineering and Technology

Department: CSE-AIML

Name of the Faculty Guide: Ms. S.S.V Kiranmayi MTech,(PhD)

Duration of the CSP: From 11-05-2026 To 20-06-2026

Name of the Student: Gunji Yuvaraj

Program of Study: Bachelor of Technology

Register Number: 24P31A42T5

Year of Study: 2025-2026

Semester: 3-1

Date of Submission: 22-09-2026

Community Service Project Report

Submitted in accordance with the requirement for the degree of Bachelor of Technology

INSTITUTE VISION

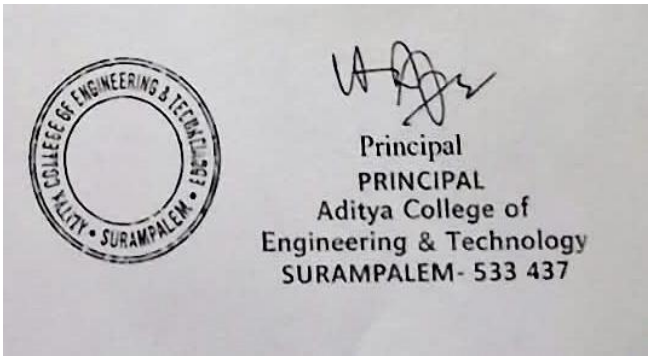

To induce higher planes of learning by imparting technical education with

- ✓ International standards
- ✓ Applied research
- ✓ Creative Ability
- ✓ Value based instruction and to emerge as a premiere institute

INSTITUTE MISSION

Achieving academic excellence by providing globally acceptable technical education by forecasting technology through

- ✓ Innovative Research And development
- ✓ Industry Institute Interaction
- ✓ Empowered Manpower

VISION & MISSION OF THE DEPARTMENT

VISION

To be a recognized Computer Science and Engineering hub striving to meet the growing needsof the Industry and Society.

MISSION

M1: Imparting Quality Education through state-of-the-art infrastructure with industrycollaboration.

M2: Enhance Teaching Learning Process to disseminate knowledge.

M3: Organize Skill based, Industrial and Societal Events for overall Development.

Head of the Department

ADITYA COLLEGE OF ENGINEERING & TECHNOLOGY(A)
(An AUTONOMOUS Institution)
Approved by AICTE, New Delhi * Permanently Affiliated to JNTUK, Kakinada
Accredited by NBA* Accredited by NAAC A+ Grade with CGPA of 3.40
Recognized by UGC Under Sections 2(f) and 12(B) of the UGC Act, 1956
Aditya Nagar, ADB Road, Surampalem, Gandepalli Mandal, Kakinada District - 533437, A.P
Ph. 99591 76665, Email: office@acet.ac.in, www.acet.ac.in

PROGRAMME EDUCATIONAL OBJECTIVES (PEOS)

PEO1:	**Proficiency in Al & ML. Applications** Expertise in designing, developing and deploying Al and ML solutions forhealthcare, finance, and autonomous system problems
PEO2:	**Lifelong Learning a and Adaptability** Adapt to evolving technologies and industry trends in Al and M. through continuous learning and self-improvement
PEO3:	**Effective Communication and Collaboration** Possess strong communication mating them to effectively collaborate withinterdisciplinary teams and solve complex problems using Al and ML concepts

Head of the Department

PROGRAMME SPECIFIC OUTCOMES (PSOS)

PSO1:	**AI and ML system development** Design and develop, and implement AI and ML systems by applying fundamental principles, algorithms and techniques.
PSO2:	**Data-Driven Decision-Making** Collect, Preprocess and analyze large and diverse datasets to extract meaningful insights using AI and ML techniques to support data-driven decision-making processes in various domains.

Head of the Department

ACKNOWLEDGEMENTS

It is with immense pleasure that we would like to express our indebted gratitude to my **project supervisor**, **Ms.S.S.V.Kiranmayi**, M.Tech, (Ph.D) who has guided us a lot and encouraged us in every step of project work, his valuable moral support and guidance has been helpful in successful completion of this Project.

We wish to express our sincere thanks to **Dr. CH SVVSN MURTY** MTech., Ph.D., **Head of the Department of CSE - ARTIFICIAL INTELLIGENCE & MACHINE LEARNING**, for her valuable guidance given to us throughout the period of the project work.

We feel elated to thank **Dr. A. Ramesh,** MTech., Ph. D., **Principal,** of Aditya College of Engineering and Technology (A) for his encouragement and support in completion of our project and throughout our course.

.

We feel delighted to thank **Dr. P. S.V.V. RAVI KUMAR** M.Tech.,Ph.D., **Dean (Academics)** of Aditya College of Engineering and Technology (A) for his cooperation in completion of our project work.

We wish to express our sincere thanks to all faculty members, and lab programmers for their valuable guidance given to us throughout the period of the project.

We avail this opportunity to express our deep sense and heart full thanks to the **Management** of **Aditya College of Engineering & Technology (A)** for providing a great support to us by arranging the trainers, and facilities needed to complete our project and for giving us the opportunity to do this work.

ACKNOWLEDGEMENTS

It is with immense pleasure that we would like to express our indebted gratitude to my **project supervisor**, **Ms.S.S.V.Kiranmayi**, M.Tech, (Ph.D) who has guided us a lot and encouraged us in every step of project work, his valuable moral support and guidance has been helpful in successful completion of this Project.

We wish to express our sincere thanks to **Dr. CH SVVSN MURTY** MTech., Ph.D., **Head of the Department of CSE - ARTIFICIAL INTELLIGENCE & MACHINE LEARNING**, for her valuable guidance given to us throughout the period of the project work.

We feel elated to thank **Dr. A. Ramesh,** MTech., Ph. D., **Principal,** of Aditya College of Engineering and Technology (A) for his encouragement and support in completion of our project and throughout our course.

.

We feel delighted to thank **Dr. P. S.V.V. RAVI KUMAR** M.Tech.,Ph.D., **Dean (Academics)** of Aditya College of Engineering and Technology (A) for his cooperation in completion of our project work.

We wish to express our sincere thanks to all faculty members, and lab programmers for their valuable guidance given to us throughout the period of the project.

We avail this opportunity to express our deep sense and heart full thanks to the **Management** of **Aditya College of Engineering & Technology (A)** for providing a great support to us by arranging the trainers, and facilities needed to complete our project and for giving us the opportunity to do this work.

ABSTRACT

Agriculture plays an important role in the livelihood of rural communities, creating a need for accessible and reliable agricultural information. As part of the Community Service Project, our team focuses on understanding the agricultural information and awareness needs of the community in Rangampeta village near Rajahmundry through field visits, farmer interactions and survey activities.

To address the identified needs, we develop a web-based “Farmer Support Application for Agricultural Information and Awareness.” The application provides information on 15 major crops, common pests and diseases, natural farming practices and government schemes in a single platform. It also supports English, Telugu and Hindi, along with a voice assistant and Help & Farmer Guidance section to improve accessibility for rural users.

The project connects community needs with a practical digital solution and promotes awareness of better agricultural practices, sustainable farming and available farmer-support resources. Through this project, students develop skills in community interaction, survey analysis, teamwork, web development, communication and problem-solving, while contributing a technology-based approach to agricultural information and awareness.

CHAPTER 1: EXECUTIVE SUMMARY

1.1 Brief Description of the Community:

Rangampeta village near Rajahmundry, Andhra Pradesh, serves as the community selected for the Community Service Project. Agriculture forms an important part of the local livelihood, with paddy cultivation among the major agricultural activities observed during the field visit. The project team interacts with farmers and community members to understand their agricultural practices, information needs and common challenges. The community visit provides practical exposure to rural life and helps the students connect their technical knowledge with real community requirements.

1.2 Summary of All the Activities:

The CSP activities include community selection, field visits, farmer interaction, agricultural survey, field observation and identification of information needs. The team collects relevant observations and photographs during the village visit and analyses the requirements identified from the community. Based on these observations, the team develops the Farmer Support Application for Agricultural Information and Awareness. The application includes crop information, pests and diseases, natural farming practices, government schemes, multilingual support, a voice assistant and a Help section. The team also performs website testing, prepares project documentation and presents the completed work.

1.3 Learning Objectives:

The major learning objectives of the project are:

- To understand the role of agriculture in a rural community.
- To develop effective communication skills through interaction with farmers.
- To learn the basic process of conducting a community survey.
- To identify community needs through field observation and interaction.

- To apply technical knowledge to address a practical community requirement.
- To improve web development and problem-solving skills.
- To develop teamwork, leadership and time-management skills.
- To understand the importance of multilingual and accessible digital services.

1.4 Project Outcomes:

The major outcomes of the project include:

- Development of a Farmer Support Application for Agricultural Information and Awareness.
- Organization of crop, pest and disease information in a single digital platform.
- Inclusion of natural farming practices and government scheme information.
- Integration of English, Telugu and Hindi language support.
- Development of a simple voice assistant and farmer-support Help section.
- Improved understanding of community needs through field interaction and survey.
- Development of technical, communication, teamwork and documentation skills.
- Creation of a practical digital solution connecting agricultural awareness with community service.

CHAPTER 2: OVERVIEW OF THE COMMUNITY

2.1 Historical Profile of the Community / Habitation:

Rangampeta village, located near Rajahmundry in Andhra Pradesh, represents a rural community with a strong connection to agriculture. The village has an agricultural environment where cultivated fields and farming activities form an important part of daily life. Paddy cultivation is one of the major agricultural activities observed during the community visit. Farming practices are influenced by seasonal conditions, soil, water availability and local experience. The field visit provides an opportunity to understand the agricultural environment and interact directly with the local community.

2.2 Community Diversity:

Rangampeta community consists of people engaged in agriculture, agricultural labour and other occupations that support rural life. Farmers have different levels of experience, resources and approaches to cultivation. The community interaction provides an opportunity to understand these different perspectives and their agricultural information requirements. People depend on cooperation and interaction for various farming-related activities. This diversity highlights the importance of providing agricultural information in a simple and accessible manner.

2.3 Traditions of the Community:

Agriculture in the community reflects a combination of traditional knowledge and modern farming practices. Farmers use experience gained over generations to understand seasons, crop cultivation and field management. Traditional practices continue to play an important role in agricultural activities. At the same time, awareness of sustainable and improved farming methods can support better resource management. The project promotes practices such as organic inputs, mulching, crop rotation, intercropping, water conservation and recycling of farm waste.

2.4 Community Ethics and Values:

The community reflects values such as cooperation, mutual support, respect for farmers and responsible use of natural resources. Farming activities often require coordination and support among community members. Sharing practical knowledge and helping one another are important aspects of rural community life. The interaction with the community also encourages students to communicate respectfully and understand local perspectives. These values help develop social responsibility and a positive approach towards community service.

2.5 Brief Note on Socio-Economic Conditions of the Community:

Agriculture forms an important part of the socio-economic conditions of the community and provides livelihood opportunities for farmers and agricultural workers. The economic condition of farming households can depend on crop yield, water availability,seasonal conditions, input costs and market opportunities. Farmers also require timely information about cultivation methods, pest and disease management and available government support. Access to reliable agricultural information can improve awareness and help users make informed decisions. The Farmer Support Application developed through this CSP provides organized information on crops, pests and diseases, natural farming and government schemes to support agricultural awareness.

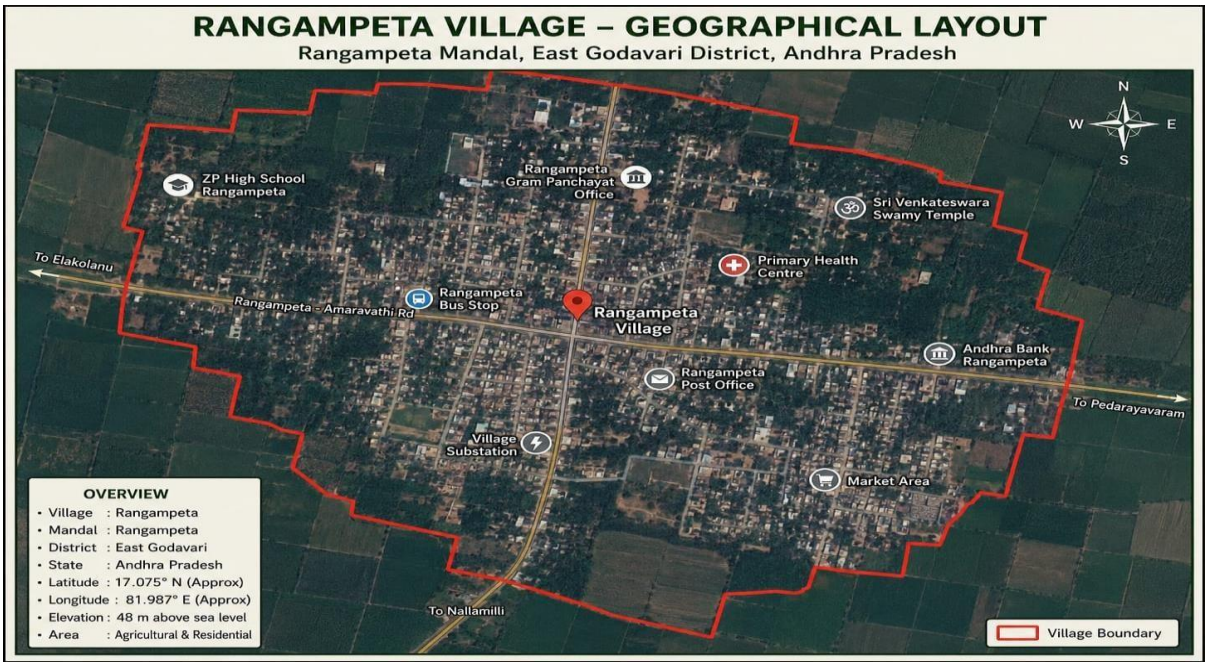

Fig. 1: Rangampeta village layout

Fig. 2: Agriculture landscape of Rangampeta village

CHAPTER 3: COMMUNITY SERVICE PART

3.1 Activities Undertaken in the Community:

The Community Service Project focuses on understanding the agricultural needs of the community and developing a suitable digital solution. The activities include community visits, interaction with farmers, field observation, survey, identification of agricultural information needs, website development, testing and documentation. The work progresses from understanding the community to developing and evaluating the Farmer Support Application for Agricultural Information and Awareness.

ACTIVITY LOG FOR THE FIRST WEEK:
(11-05-2026 to 16-05-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Introduction to the Community Service Project and selection of agriculture as the project area.	Understanding the purpose and scope of the CSP.	
Day 2	Discussion about the selected community and agriculture-related activities.	Understanding the importance of community selection.	
Day 3	Planning the village visit and community interaction activities.	Developing planning and coordination skills.	
Day 4	Preparation of questions for the agricultural survey.	Learning the basics of community survey preparation.	
Day 5	Discussion about possible agricultural information needs.	Understanding the importance of identifying community needs.	
Day 6	Review of planned activities and preparation for the field visit.	Improving teamwork and project planning	

.

Weekly Report of Week-1:

The first week focuses on understanding the objectives of the Community Service Project and selecting agriculture as the project area. The team plans the community visit and discusses the type of agricultural information required for the survey. A basic questionnaire is prepared to guide interaction with farmers and community members. The week also helps the students understand the importance of planning, teamwork and communication before beginning field activities.

ACTIVITY LOG FOR THE SECOND WEEK:
(18-05-2026 to 23-05-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Visit to Rangampeta village and interaction with community members.	Gaining practical exposure to rural community life.	
Day 2	Interaction with farmers regarding agricultural activities.	Improving communication and interpersonal skills.	
Day 3	Observation of agricultural fields and paddy cultivation.	Understanding local agricultural practices.	
Day 4	Conducting the agricultural survey and collecting information.	Learning practical information collection methods.	
Day 5	Taking photographs and recording field observations.	Developing field observation and documentation skills.	
Day 6	Reviewing and organizing the information collected during the visit.	Learning to organize community information systematically.	

Weekly Report of Week-2:

The second week focuses on the field visit to Rangampeta village. The team interacts with farmers and community members and observes agricultural activities in the surrounding area. Paddy cultivation is among the agricultural activities observed during the visit. The students collect relevant information, record observations and take photographs for documentation. The field interaction provides practical understanding of the community and its agricultural environment.

ACTIVITY LOG FOR THE THIRD WEEK:
(25-05-2026 to 30-05-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Reviewing the information collected during the community visit.	Learning to analyse field observations.	
Day 2	Identifying agricultural information and awareness needs.	Understanding community requirements.	
Day 3	Discussing possible solutions for the identified needs.	Developing problem-solving skills.	
Day 4	Planning the structure of the Farmer Support Application.	Learning basic website planning.	
Day 5	Organizing crop and agricultural information for the website.	Improving content organization skills.	
Day 6	Reviewing the proposed Website features.	Improving teamwork and project coordinati	n

Weekly Report of Week-3:

The third week focuses on analysing the observations obtained from the community visit. The team identifies the importance of providing organized agricultural information through a simple digital platform. Based on these requirements, the structure of the Farmer Support Application for Agricultural Information and Awareness is planned. The major sections include crop information, pests and diseases, natural farming, government schemes, voice assistance and farmer support.

ACTIVITY LOG FOR THE FOURTH WEEK:
(01-06-2026 to 06-06-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Developing the basic website structure and home page.	Improving HTML and webpage development skills.	
Day 2	Developing the crop information section.	Learning to present agricultural information clearly.	
Day 3	Adding crop-wise information and relevant images.	Improving content presentation skills.	
Day 4	Developing the Pests & Diseases section.	Understanding the importance of agricultural awareness.	
Day 5	Developing the Natural Farming section.	Learning about sustainable farming practices.	
Day 6	Testing website navigation and page connections.	Developing testing and debugging skills.	

Weekly Report of Week-4:

During the fourth week, development of the Farmer Support Application was carried out. The basic website structure and major pages were implemented using HTML, CSS and JavaScript. The crop information, pests and diseases, and natural farming sections were developed. The website was organized into separate pages so that users could easily navigate to the required agricultural information.

ACTIVITY LOG FOR THE FIFTH WEEK:
(08-06-2026 to 13-06-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Developing the Government Schemes section.	Learning to organize farmer-support information.	
Day 2	Adding English, Telugu and Hindi language support.	Understanding the importance of multilingual accessibility.	
Day 3	Developing the Farmer Voice Assistant.	Learning about voice-based web functionality.	
Day 4	Developing the Help and Farmer Guidance section.	Understanding the importance of user support.	
Day 5	Adding relevant agricultural images and official links.	Improving content organization and resource management.	
Day 6	Testing the newly developed website features.	Improving debugging and testing skills.	

Weekly Report of Week-5:

The fifth week focuses on adding features that improve the accessibility and usefulness of the application. The Government Schemes section provides information about major farmer-support programmes and official resources. The application also supports English, Telugu and Hindi to make the content accessible to a wider range of users. A simple voice assistant and Help section are added to provide additional support to users.

ACTIVITY LOG FOR THE SIXTH WEEK:
(15-06-2026 to 20-06-2026)

Day & Date	Brief Description	Learning Outcome	Person In-Charge & Signature
Day 1	Testing all major sections of the website.	Learning systematic website testing.	
Day 2	Testing the English, Telugu and Hindi language options.	Improving multilingual testing skills.	
Day 3	Testing the voice assistant and website navigation.	Improving debugging and problem-solving skills.	
Day 4	Reviewing the website according to the identified community needs.	Learning project evaluation.	
Day 5	Preparing website screenshots and field photographs for documentation.	Developing technical documentation skills.	
Day 6	Final project review and preparation for CSP presentation.	Improving presentation and teamwork skills.	

Weekly Report of Week-6:

The sixth week focuses on final testing, evaluation and documentation of the project. The team checks the major website sections, language selection, navigation, voice assistant and Help features. The completed application is reviewed in relation to the agricultural information needs identified during the community interaction. Screenshots, photographs and other project materials are organized for the final CSP documentation and presentation.

3.2 Skills Acquired During the Project:

The Community Service Project provides the team with an opportunity to develop both technical and interpersonal skills. The field activities improve communication, observation and community interaction, while the website development work strengthens technical and problem-solving abilities.

Technical Skills:

- HTML and CSS-based webpage development
- JavaScript programming
- Responsive web design
- Website navigation and page organization
- Multilingual website development
- Voice-based web interaction
- Website testing and debugging
- Agricultural content organization
- Technical documentation

Communication and Community Skills:

- Interaction with farmers and community members
- Survey preparation and information collection
- Field observation
- Communication and presentation
- Teamwork and coordination
- Problem identification
- Time management
- Leadership and responsibility
- Social awareness and community participation

CHAPTER 4:OUTCOMES DESCRIPTION

4.1 Details of the Socio-Economic Survey of the Village / Habitation

The socio-economic survey focuses on understanding the agricultural activities and information needs of the community in Rangampeta village near Rajahmundry. The team visits the village and interacts with farmers and community members to understand their agricultural practices and requirements. Paddy cultivation forms an important part of the agricultural activities observed during the visit. The survey also considers the need for accessible information related to crops, pests, natural farming and government support. The observations from the field visit provide a foundation for developing a suitable community-oriented solution.

4.2 Questionnaire Prepared for the Survey

1. What is the main occupation of people in the community?
2. What are the major crops cultivated in the area?
3. What type of agricultural information is commonly required by farmers?
4. What are the common problems faced during crop cultivation?
5. How do farmers usually obtain agricultural information?
6. What are the common pests and diseases affecting crops?
7. What methods are commonly used to control pests and diseases?
8. Are farmers aware of natural farming practices?
9. Are farmers aware of government schemes available for agriculture?
10. Would agricultural information in Telugu and Hindi be useful?
11. Would a single website containing agricultural information be useful to farmers?
12. What features would be useful in an agricultural support website?
13. Would voice-based assistance be helpful for accessing agricultural

information?

14. What type of support or information do farmers expect from a digital agricultural platform?
15. What improvements can help farmers access agricultural information more easily?

4.3 Problems Identified and Proposed Solutions:

1. **Lack of agricultural information in one place:**

Farmers may need to collect agricultural information from different sources. To address this problem, the Farmer Support Application provides useful agricultural information on a single platform.

2. **Difficulty in identifying pests and diseases:**

Farmers may face difficulty in identifying common pests and crop diseases. The website provides a Pests & Diseases section with information about common problems and their management.

3. **Limited awareness of natural farming:**

There may be limited awareness of sustainable and natural farming methods. The Natural Farming section provides information about organic inputs, mulching, crop rotation, intercropping and water conservation.

4. **Difficulty in accessing government schemes:**

Farmers may not easily find information about agricultural government schemes. The Government Schemes section provides useful scheme information and official resources.

5. **Language barriers:**

Agricultural information may not always be available in a language that is comfortable for local users. The application supports English, Telugu and Hindi for better accessibility.

6. **Difficulty in typing or searching**:

Some rural users may find typing or searching online difficult. A Farmer Voice Assistant is included to provide voice-based access to agricultural information.

7. **Need for quick guidance and support:**

Farmers may require quick access to useful guidance and support information. The Help & Farmer Guidance section provides relevant resources and contact information.

8. Scattered crop information:

Information about different crops may be available from different sources. The application organizes crop-wise information in one simple platform.

9. Difficulty in understanding online resources:

Complex information and difficult navigation can make online resources less useful. The website uses simple language, clear navigation and organized content.

10. Limited awareness of available agricultural resources:

Farmers may not be aware of all the available agricultural resources. The Farmer Support Application brings important agricultural information and support resources together in one place.

4.4 Short-Term and Long-Term Action Plans for Possible Solutions:

Short-Term Action Plan

The short-term plan focuses on providing useful agricultural information through a simple website. The application provides crop information, pest and disease awareness, natural farming practices and government scheme details. English, Telugu and Hindi support improves accessibility, while the voice assistant provides an additional way to interact with the application. A Help section provides farmer-support information and useful official resources.

Long-Term Action Plan

Future improvements can expand the application with more crops, regularly updated government information, weather and market-related resources, local agricultural services and improved voice interaction. Offline access and a dedicated mobile application can also be considered for areas with limited connectivity. Expert-supported agricultural guidance can further improve the usefulness of the platform.

4.5 Community Awareness Programme(s) Conducted:

The team conducts community interaction and awareness activities during the village visit to understand agricultural information requirements. Discussions with community members focus on farming practices, agricultural information and available support resources. The developed Farmer Support Application also serves as an awareness tool by presenting information about crops, pests and diseases, natural farming and government schemes. The activity helps connect technical knowledge with practical community requirements and promotes awareness through a simple digital platform.

4.6 Report of the Mini-Project Work Done:

4.6.1 Title of the Mini-Project

Farmer Support Application for Agricultural Information and Awareness

The Farmer Support Application is a web-based platform designed to provide useful agricultural information through a single, simple interface. The project connects the agricultural information needs identified during the community interaction with a practical digital solution.

4.6.2 Major Features

1.Home Page:

Provides an introduction to the application and easy navigation to the major sections.

2.Crop Information:

Provides information about 15 crops, including rice, maize, groundnut, cotton, sugarcane, chilli, turmeric, pulses, tomato, onion, banana and coconut.

3.Pests & Diseases:

Provides awareness about common agricultural pests and diseases along with general prevention and management information.

4.Natural Farming:

Provides information about practices such as farmyard manure, mulching, crop rotation, intercropping, water conservation and farm-waste recycling.

5.Government Schemes:

Provides information about major farmer-support schemes along with links to relevant official resources.

6.Multilingual Support:

The application supports English, Telugu and Hindi to improve accessibility for different users.

7.Farmer Voice Assistant:

Provides simple voice and text-based interaction for selected agricultural queries, with speech output for responses.

8.Help & Farmer Guidance:

Provides useful farmer-support contacts, agriculture department information, official resources and basic guidance.

4.6.3 Technologies Used

The application uses HTML, CSS and JavaScript for webpage structure, styling and functionality. JavaScript supports dynamic content, language switching and the voice-assistant features. Responsive design helps the application work on different screen sizes.

4.6.4 Project Outcome

The project results in a single digital platform that organizes important agricultural information in an easy-to-understand format. It combines community-oriented learning with technical development and provides a foundation for further improvements in digital agricultural awareness and farmer support.

CHAPTER 5: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

5.1 Recommendations:

1. **Regularly update agricultural information:**

Crop information, pest and disease details, natural farming methods and government schemes should be updated regularly.

2. **Increase crop coverage:**

More crops can be added to provide useful information to farmers with different cultivation needs.

3. **Improve multilingual support:**

Telugu, Hindi and English content should be maintained properly so that users can access information in their preferred language.

4. **Improve voice assistance:**

The voice assistant can be enhanced to understand farmers' questions and provide simple agricultural guidance.

5. **Provide reliable support information:**

Important agriculture department contacts, farmer helpline numbers and other useful support resources can be included in the Help section.

6. **Promote natural farming:**

Farmers can be encouraged to learn about sustainable practices such as organic inputs, composting, mulching and water conservation.

7. **Encourage digital awareness:**

Awareness activities can help farmers understand how digital platforms can support them in accessing agricultural information.

5.2 Conclusion:

The Community Service Project provides an opportunity to understand the agricultural needs of the community through field visits, farmer interaction and survey activities. The observations from Rangampeta village help identify the need for simple and accessible agricultural information.

To address these needs, the Farmer Support Application for Agricultural Information and Awareness brings crop information, pests and diseases, natural farming, government schemes, multilingual support, voice assistance and farmer guidance together on one platform.

The project connects community service with technology and helps students develop practical skills in communication, teamwork, web development, problem-solving and documentation. Overall, the project provides a useful digital approach to improving agricultural information and awareness.

1.Introduction to CSP

Community Service Project

- CSP connects academic learning with real community needs.
- Our project focuses on understanding the agricultural needs of a rural community.
- We conducted field visits, farmer interaction and an agricultural survey.
- The information collected helped us identify important community requirements.
- Based on these requirements, we developed a technology-based agricultural support solution.

2.Community Selected: Rangampeta

Rangampeta Village

- Rangampeta is a rural community near Rajahmundry, Andhra Pradesh.
- Agriculture is an important part of the local livelihood.
- Paddy cultivation was one of the major agricultural activities observed.
- The community was selected for our agricultural survey and field interaction.
- The visit helped us understand the local farming environment and information needs.

3.Agriculture as the Project Focus

Why Agriculture?

- Agriculture plays an important role in rural communities.
- Farmers require timely and reliable agricultural information.
- Information about crops, pests and diseases is important for farming activities.
- Farmers can benefit from awareness of natural farming practices and government schemes.
- A simple digital platform can make useful agricultural information easier to access.

4.Community Visit & Survey

Field Visit to Rangampeta

- Visited Rangampeta to understand the local agricultural environment.
- Interacted with farmers and community members.
- Conducted an agricultural survey.
- Collected information through discussion, observation and questionnaires.
- Recorded field observations and photographs for project documentation.

5.Agricultural Activities Observed

Activities Observed During the Visit

- Paddy cultivation
- Agricultural field maintenance
- Crop care and management
- Use of traditional farming knowledge
- Seasonal agricultural activities
- Farmers' dependence on timely agricultural information

6.Problems Identified

- Agricultural information is scattered across different sources.
- Difficulty in identifying common pests and diseases.
- Limited awareness of natural farming practices.
- Difficulty in finding government scheme information.
- Need for agricultural information in local languages.
- Typing and searching may be difficult for some users.
- Need for simple farmer guidance and support.

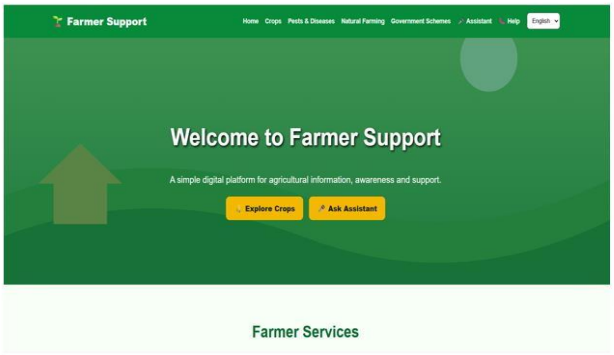

7.Proposed Digital Solution

Farmer Support Application

A simple web-based platform that brings important agricultural information together in one place.

Key Features

- 🌾 Crop Information
- 🦠 Pests & Diseases
- 🌱 Natural Farming
- 🏛️ Government Schemes
- 🌐 English, Telugu & Hindi
- 🎤 Voice Assistant
- ☎️ Help & Farmer Guidance

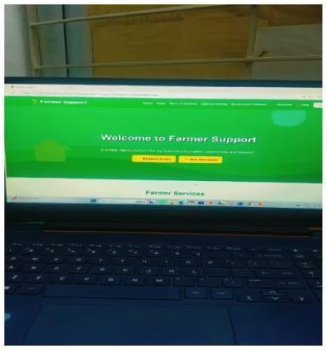

8.Farmer Support Application

Application Overview

The Farmer Support Application provides:

- Simple and user-friendly navigation
- Organized agricultural information
- Crop-wise information
- Pest and disease awareness
- Natural farming guidance
- Government scheme information
- Multilingual support
- Voice-based assistance
- Help and farmer guidance

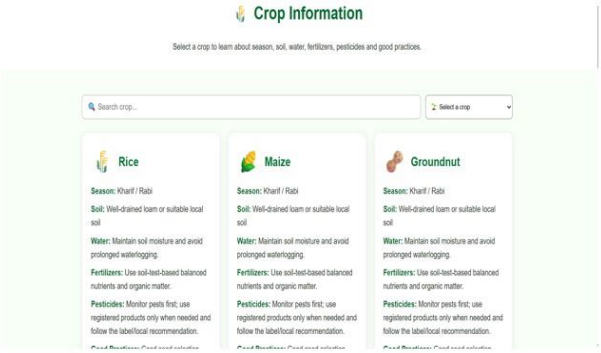

Play/Pause (Alt+P)

9.Application Features & Modules

Crop Information:

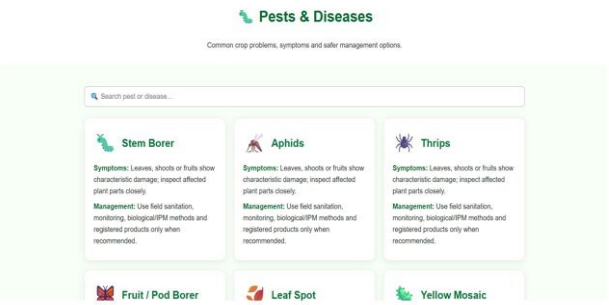

- Provides crop-wise agricultural information.
- Includes cultivation methods and basic crop details.
- Provides information about suitable seasons and soil requirements.
- Includes crop care and management practices.
- Helps users access crop information in an organized manner.

Pests & Diseases Module

Pests & Diseases

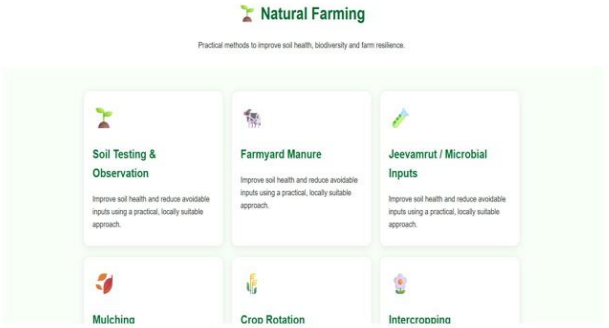

- Provides information about common agricultural pests.
- Includes information about common crop diseases.
- Helps users understand basic identification.
- Provides prevention and management information.
- Improves awareness about crop protection.

Natural Farming Module

The module provides information about:

- Organic inputs
- Composting
- Mulching
- Crop rotation
- Intercropping
- Water conservation
- Recycling of farm waste

Government Schemes Module

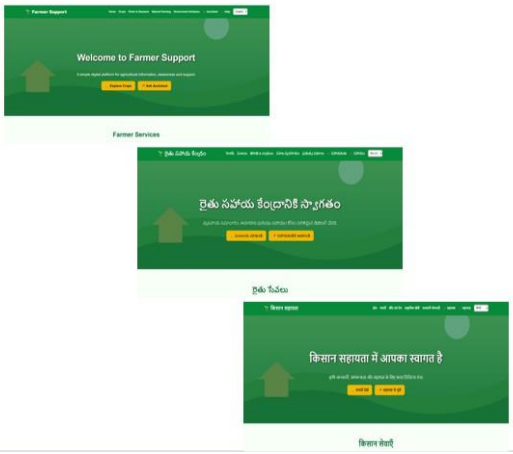

- Provides information about agricultural welfare schemes.
- Helps farmers become aware of available support.
- Organizes scheme-related information in one place.
- Provides relevant official resources where available.
- Makes scheme information easier to access.

Multilingual Support

English | Telugu | Hindi

- Makes agricultural information easier to understand.
- Supports users who prefer regional languages.
- Improves accessibility for rural users.
- Makes the application more inclusive.

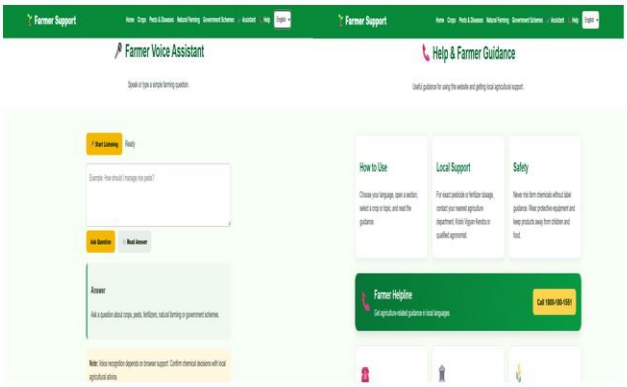

Voice Assistant & Help

Voice Assistant:

- Provides voice-based interaction.
- Reduces dependence on typing.
- Makes accessing information more convenient.

Help & Farmer Guidance:

- Provides useful agricultural support information.
- Includes relevant resources and contact information.
- Helps users find additional guidance when required.

10.Technologies Used

HTML

→ Structure of webpages

CSS

→ Design and responsive layout

JavaScript

→ Dynamic content and user interaction

JavaScript Voice Features

→ Voice assistant functionality

Multilingual Functions

→ Language switching

11.Outcomes & Skills Acquired

Project Outcomes

- Developed a Farmer Support Application.
- Organized agricultural information in one platform.
- Added multilingual and voice-based features.
- Provided agricultural awareness resources.
- Connected community requirements with technology.

Skills Acquired:

- Web Development
- Survey & Data Collection
- Communication
- Teamwork
- Problem Solving
- Documentation
- Presentation Skills

Conclusion

- The CSP helped us understand the agricultural needs of the community.
- Field visits and farmer interactions helped us identify important information needs.
- We developed the Farmer Support Application as a digital solution.
- The application brings agricultural information and support resources together.
- The project helped us connect technology with community service.
- We gained practical experience in web development, communication, teamwork and problem-solving.

Thank You
